Northern Florida West Coast Closing to King Mackerel Commercial Fishing

NOAA Fisheries Service will close the northern Florida west coast subzone of the Gulf of Mexico to commercial fishing for king mackerel **effective 12:00 noon (local time) October 12, 2013**. The commercial quota of 178,848 pounds for this zone is projected to be reached by this date. This subzone is located in federal waters of the Gulf of Mexico east of the Alabama/Florida state line and along Florida's west coast to the Lee/Collier County line. Florida is expected to close adjoining state waters at the same time.

During the closure, no commercial fisherman may fish for or keep king mackerel in or from the closed zone. There is an exception for people aboard a vessel that has a charter/headboat permit for coastal migratory pelagic fish and a commercial king mackerel permit. Those people may keep the 2-fish per person daily king mackerel bag limit from the closed zone, if the vessel is operating as a charter vessel or headboat. Vessels are considered to be operating as a charter vessel or headboat when they carry a passenger who pays a fee or when more than three people are aboard, including operator and crew.

During the closure, no king mackerel caught in the closed zone may be bought, sold, or traded. This includes recreational and tournament-caught fish. King mackerel that were traded or sold before the closure and held in cold storage by a dealer or processor may still be sold.

This summary is not a substitute for the actual regulations. We encourage you to read the full text of the regulations, available at <http://sero.nmfs.noaa.gov/>.

To receive fishery bulletins via email, please sign up through Constant Contact at <http://bit.ly/HQDUEU>. You may also sign up for Constant Contact by visiting our website <http://sero.nmfs.noaa.gov> (sign-up option is located on the left side of the page). The electronic copy of the bulletin will be delivered to you faster than the paper copy, is in color, features informational links, and reduces paper use.
